

Project Assistant Position at Chemistry Department, Ashoka University

Position: A project Assistant position is open in Bioinorganic lab at the *Department of Chemistry*, Ashoka University. The appointee will work closely with the PhD scholars in the group and will be supervised by *Dr. Munmun Ghosh*. The main objective of the project will be synthesis of Molecular catalysts and its application in small molecule activation like O₂, CO₂. The project demands candidates willing to do organic synthesis and study its application electrochemically. For any further queries regarding the project, applicants are encouraged to contact Dr Munmun Ghosh (munmun.ghosh@ashoka.edu.in)

Start Date: September 2022

Requirements:

- Post-graduate degree in Chemistry with minimum 55% marks.
- Experience in organic synthesis and knowledge about NMR, X-ray diffraction and absorption/emission spectroscopy will be advantageous.
- Must have an enthusiasm for research, passion to learn and be able to maintain meticulous records of experimental procedures.
- Minimum knowledge in Electrochemistry

Duration: Initial appointment will be for 6 months, which is extendable to further 6 months upon satisfactory performance.

Salary and benefits: Salary and benefits will be according to Ashoka University norms.

Closing Date: 15/08/2022

Interested individuals should email their curriculum vitae (CV) detailing relevant research experience and contact details of at least two referees (email and contact number) to Dr. Munmun Ghosh at munmun.ghosh@ashoka.edu.in.

(Only shortlisted candidates will be notified)
